PRODUCTION NORMS

- A. As per the 12(1) MOU signed between parties on 21.09.2015, an Industrial Engineering work study was conducted by the University of Moratuwa, hereinafter called as UOM, for the period 1.8.2015 till 31.01.2016 for 80 dye machines and the Established Norm were derived by considering the machine group wise average cycle time and also the actual Lot per machine per day. As per the study report, the total actual lots which can be achieved per day is 950 lots including Kier wash.
- B. Based on Union request for easy calculation, SSP equivalent factor was used to convert the actual lots mentioned in the IE report from UOM. The SSP equivalent lots including Kier wash was then derived by multiplying actual lots including Kier wash with SSP equivalent factor during the study period for individual machine group which is 1349 SSP Equivalent lots including Kier wash.
- C. As agreed by Union, 90% of the SSP Equivalent lots including Kier wash ie. 1214 is set as the Agreed Norm for 80 machines.
- D. Further, as agreed during the discussions with the management, the target with effect from 04th August 2022 will be considered as 1267 SSP Equivalent Lots equal to 90% of the target of 91 machines with KierWash, which was based as per the calculation followed by the Moratuwa University mentioned above. Please use the “Schedule 1B” for dyeing program and SSP Equivalent Factors.
- E. Accordingly, both parties agree that the minimum production norm for 91 dyeing machines fixed in the Dye House is SSP Equivalent factor Lot 1267.
- F. The parties agree that the Employer is not obliged or required to remedy any salary anomalies that may arise in future as a result of the salary revisions specified in this agreement.
- G. The following conditions will be considered when determining the norm set out for all departments mentioned hereunder this agreement.
- Utility Failure hours will be considered for norm reduction.
 - Any Machine breakdown greater than 1 hour will be considered for norm reduction.
 - Any Machine stoppage for planned maintenance or Relocation will be considered for Target Reduction.
 - IT Failure (Sedo Master) hours will be considered for norm reduction.
 - The targeted lots will change proportionally subjected to machine commissioning or de commissioning.
 - If a particular Dyeing method undergoes any process change then accordingly Management will provide the revised SSP equivalent factor reflecting the change.
 - Additions of any new machinery will proportionately increase the norm and company will have the right to conduct an IE study as prescribed in the clause 15 of this agreement.
 - No orders situation will be considered for norm reduction.
 - No Payments for No pay leave
 - Exclude Permanent machine break downs due to spare part issues

- (a) This payment will be equal to the total sales value achieved against planned sales value of the Company.
- (b) The salary for the calculation of the bonus shall be the salary drawn by the respective employee in the last month of Financial Year in respect of which bonus is payable.
- (c) An employee who is absent in excess of his leave entitlement for a period of six (06) or more days will not be eligible to receive this bonus and it shall not be paid to such employee
- (d) Subject to the number of days absent in excess of an employee's leave entitlement in any one year the employer shall be entitled to make deductions from the bonus payable to an employee in the under - noted manner.

Any period of no pay leave of an employee with the approval of the management will not be regarded as absence for the above computation.

CALCULATION METHOD OF INCENTIVE SCHEMES FOR ACHIEVING PRODUCTION TARGETS

This schedule includes the method of calculation of incentives schemes and those employees who are covered under these incentive schemes.

1	Dye House	i	Incentive Scheme for Dye House Machine Operators
		ii	Incentive Scheme for Dye House Supporting Services
2	Finishing	i	Incentive Scheme for 2D Service Machine Operators & Packers
		ii	Incentive Scheme for Winders and Packers

4	Stores	i	Incentive Scheme for Transit Stores
		ii	Incentive Scheme for Raw Material Stores

1. Dye House Incentive Scheme

Common Conditions Governing the Incentive Scheme

- (1) No work no payment
- (2) No orders, no payment
- (3) Machine stoppages for whatsoever reason will not qualify for incentive.
- (4) The targeted lots will change proportionally subjected to machine commissioning, de commissioning or planned maintenance
- (5) If a particular Dyeing method undergoes any process change, the modified SSP Factor (SSP equivalent factor) is

informed by the management to the branch of trade union association and according to the program 106 method of the relevant machine, the calculation is done based on the agreement of both parties.

For this Dye House department the incentives will be calculated by two different calculation methods as Dye House Machine Operators Calculation method and Dye House Supporting Services

(i) Dye House Machine Operators

A. Dyeing Output Target

Productivity Scheme - The target starting point is 90% of the SSP Equivalent Lots including Kier wash for individual production cell as stated below followed by incremental 1% percentage increase finally up to 110%.

B. In the Schedule below, for the machine cells 2, 3, 4, 5 & 6, the incentive payment method is prepared without the decimals of the relevant targets.

Conditions:

From Group 01 to Group 06 :

1. Incentives will be calculated based on the cell achievements (Group wise) , however if the cell achievements are not met then the incentive will be calculated on the achievements of each of the individual machines. Accordingly, the total achievement of incentive of above machine group 1 to 6 will be equally distributed for all employees who work under the OFM model.
2. This will be calculated daily and paid monthly.

3. If the currently operated 91 machines with kier wash and SSP equivalent lots 1267 target has been achieved within the full work week, a 25% of the incentives earned will be paid as an additional payment.

From Group 7 to Group 11:

1. Incentives will be calculated for the relevant groups as per daily production targets agreed. If in case total daily output is not achieved in the relevant machine group, the shift-wise achievement will be considered.
2. This will be calculated daily and paid monthly.
3. If the currently operated 91 machines with kier wash and SSP equivalent lots 1267 target has been achieved within the full work week, a 25% of the incentives earned for that particular week will be paid as an additional payment.
